

## Vacancy - Quality engineer

IRD Fuel Cells is looking for a quality engineer. As a quality engineer, you become part of an ambitious QHSE department that focuses on high quality, health and safety and on sustainable processes.

IRD Fuel Cells have high expectations for you. We supply fuel cell components to the automotive industry, where the quality requirements are extra high. Therefore, we seek a person who places high demands on himself and his surroundings. You must help implement QHSE - ISO standards ISO9001, ISO45001 and ISO14001 and IATF 16949 in a common management system.

### **What are you doing?**

You will be responsible for building a quality management system and you will be part of an internal auditor's corps, which will continuously monitor the quality of production. You must be ready to create process descriptions, process diagrams, and work instructions, and implement digital tools to support production. You need to focus on QHSE Risks and continuous improvements.

You will work in a high-tech environment where you will be able to work independently and be part of different project groups that support the certification work.

### **Professional characteristics**

We expect you to have a background as a quality engineer, with a wide system knowledge. You must be familiar with ISO9001, ISO45001, ISO14001 and IATF 16949 and you must be able to link the ISO requirements together.

You must have experience in quality management in production companies and have knowledge of Lean and Kaizen and be able to master English at the business level. You may be newly qualified or have some years of experience in establishing ISO certifications.

### **Personal attributes**

You have to be ambitious, empathetic and have good energy and a good mood. You need to have the flair to work systematically and be driven by delivering high performance.

### **Deadline for applications**

We assess applications on an ongoing basis, so don't wait too long to apply. Send your application to QHSE Director Jane Lilleholt at [jali@irdfuelcells.com](mailto:jali@irdfuelcells.com) by June 3, 2020. If you have any questions about the post, call Jane Lilleholt phone: +45 6142 2472

### **We offer:**

You will be employed in a newly established QHSE department and will work in a company that is dynamic and innovative.

IRD Fuel Cells produces fuel cell components. We have been in the industry since 1996 and our highly qualified team is made up of people from many different backgrounds - and since the beginning we have strived for the same goal: To develop and secure a sustainable future.

We have a vision to be recognized as the leading supplier of the unlimited energy solutions of the future by offering tailored strategic components with a focus on lowering overall energy costs.

### **IRD Fuel Cells Company:**
