

# Machine/mechatronic engineer

---

## About the job:

*We are currently looking for Commissioning Engineers to join IRD Fuel Cells. We have been investing in advanced and complex production equipment for our new production facility in Odense. For the installation and commissioning of such equipment we need new colleagues. You will be part of a strong team of qualified technicians and engineers. The position is based in Odense, Denmark.*

## Your role:

As our new Installation and Commissioning Engineer, you will be responsible for the installation and commissioning of our new production lines. Together with the supplier you will ensure of a smooth installation process and handle the following test and commissioning phase. You will hand over a fully tested and documented production line to the production department, so they can meet our customers' demands.

- Installation process of our advanced production lines.
- Commissioning of production lines as per our customers specifications.
- Scheduling and coordinating above processes.
- Creating and carrying out test procedures.
- Investigating problems and diagnosing and repairing faults (with suppliers).
- Writing reports, documentation, and SOPs.
- Training operators and technical staff in production department.
- Providing technical support to production department.
- Ensuring safe working conditions.

## Technical qualifications:

### Required:

- Bachelor's degree or above, in mechanical or mechatronic engineering.
- 5 years of relevant work experience in installation or servicing of complex systems.
- Good skills of English both orally and in writing.
- Good understanding of PLC systems including the programming.

### Desired:

- Experience with converting systems for fuel cells, battery production or similar.
- Knowledge of fuel cell technology.
- Knowledge of clean room working environment.

## Personal qualifications:

- Able to communicate clearly with colleagues, and suppliers.
- Service-minded.
- Ability to work in a structured manner.
- Proactive approach to work.
- Analytical skills.

**About Us:**

At IRD Fuel Cells, we are devoted to production of fuel cell components for our customers all over the World.

We have been in the fuel cells business since 1996, and our highly skilled team comprises people with many different backgrounds – and since the beginning we have been striving for the same goal: To develop and ensure a sustainable future.

We are a dynamic and dedicated team of technicians and researchers, and we are looking forward to work together with you!

If you are interested in this opportunity and believe you would be a great fit, please submit your CV and a cover letter explaining why you would be the ideal candidate.

Please send it to:
